THE ANNALS *of* STATISTICS

An Official Journal of the
Institute of Mathematical Statistics

Articles appearing in *The Annals of Statistics* (volumes 1–17) are indexed in the *Cumulative Index to IMS Scientific Journals*, available from the Institute of Mathematical Statistics.

VOLUME 26

1998

CONTENTS OF VOLUME 26

Articles

ADROVER, JORGE G. Minimax bias-robust estimation of the dispersion matrix of a multivariate distribution 2301–2320

AMIT, YALI AND GEMAN, DONALD. Discussion of "Arcing classifiers" by Leo Breiman 833–837

ANDERSSON, STEEN AND MADSEN, JESPER. Symmetry and lattice conditional independence in a multivariate normal distribution 525–572

ASSAF, DAVID, GOLDSTEIN, LARRY AND SAMUEL-CAHN, ESTER. A statistical version of prophet inequalities 1190–1197

BARRON, ANDREW AND HENGARTNER, NICOLAS. Information theory and superefficiency 1800–1825

BARTLETT, PETER, LEE, WEE SUN, SCHAPIRE, ROBERT E. AND FREUND, YOAV. Boosting the margin: A new explanation for the effectiveness of voting methods 1651–1686

BAYARRI, M. J. AND BERGER, JAMES. Robust Bayesian analysis of selection models 645–659

BERAN, RUDOLF AND DÜMBGEN, LUTZ. Modulation of estimators and confidence sets 1826–1856

BERAN, RUDOLF AND FISHER, NICHOLAS I. Nonparametric comparison of mean directions or mean axes 472–493

BERGER, JAMES AND BAYARRI, M. J. Robust Bayesian analysis of selection models 645–659

BICKEL, PETER J. NIELSEN, JENS P. AND LINTON, OLIVER. On a semiparametric survival model with flexible covariate effect 215–241

BICKEL, PETER J. RITOV, YA'ACOV AND RYDÉN, TOBIAS. Asymptotic normality of the maximum-likelihood estimator for general hidden Markov models 1614–1635

BISCHOFF, WOLFGANG. A functional central limit theorem for regression models 1398–1410

BOSE, ARUP. Bahadur representation of M_m estimates 771–777

BOUCKAERT, REMCO R. AND STUDENÝ, MILAN. On chain graph models for description of conditional independence structures 1434–1495

BREIMAN, LEO. Arcing classifiers 801–823

BREIMAN, LEO. Rejoinder 841–849

BROOKS, STEPHEN P. MCMC convergence diagnosis via multivariate bounds on log-concave densities 398–433

BROWN, LAWRENCE D. AND CAI, T. TONY. Wavelet shrinkage for nonequispaced samples 1783–1799

BROWN, LAWRENCE D. AND ZHANG, CUN-HUI. Asymptotic nonequivalence of nonparametric experiments when the smoothness index is 1/2 279–287

BUNKE, OLAF AND MILHAUD, XAVIER. Asymptotic behavior of Bayes estimates under possibly incorrect models 617–644

BÜHLMANN, PETER. Sieve bootstrap for smoothing in nonstationary time series 48–83
CAI, T. TONY AND BROWN, LAWRENCE D. Wavelet shrinkage for nonequispaced samples 1783–1799
CAPRA, WILLIAM B., WANG, JANE-LING AND MÜLLER, HANS-GEORG. Analysis of oldest-old mortality: Lifetables revisited 126–163
CARROLL, R. J., WANG, C. Y., WANG, SUOJIN AND GUTIERREZ, ROBERTO G. Local linear regression for generalized linear models with missing data 1028–1050
CHAN, NGAI HANG AND PALMA, WILFREDO. State space modeling of long-memory processes 719–740
CHEN, SEAN X. Weighted polynomial models and weighted sampling schemes for finite population 1894–1915
CHENG, CHING-SHUI AND MUKERJEE, RAHUL. Regular fractional factorial designs with minimum aberration and maximum estimation capacity 2289–2300
CHENG, CHING-SHUI, MARTIN, R. J. AND TANG, BOXIN. Two-level factorial designs with extreme numbers of level changes ... 1522–1539
CHOUDHURI, NIDHAN. Bayesian bootstrap credible sets for multidimensional mean functional 2104–2127
CHUNG, HAN-YEONG AND KOO, JA-YONG. Log-density estimation in linear inverse problems 335–362
COHEN, ARTHUR AND SACKROWITZ, HAROLD B. Directional tests for one-sided alternatives in multivariate models 2321–2338
DAUXOIS, JACQUES AND NKIET, GUY MARTIAL. Nonlinear canonical analysis and independence tests 1254–1278
DAVIES, P. L. On locally uniformly linearizable high breakdown location and scale functionals 1103–1125
DAVIES, P. LAURIE AND TERBECK, WOLFGANG. Interactions and outliers in the two-way analysis of variance 1279–1305
DAVIS, RICHARD A. AND MIKOSCH, THOMAS. The sample autocorrelations of heavy-tailed processes with applications to arch 2049–2080
DETTE, HOLGER AND HALLER, GERD. Optimal designs for the identification of the order of a Fourier regression 1496–1521
DETTE, HOLGER AND MUNK, AXEL. Nonparametric comparison of several regression functions: exact and asymptotic theory 2339–2368
DETTE, HOLGER AND MUNK, AXEL. Validation of linear regression models 778–800
DIACONIS, PERSI AND STURMFELS, BERND. Algebraic algorithms for sampling from conditional distributions 363–397
DIETTERICH, T. G. Discussion of "Arcing classifiers" by Leo Breiman 838–841
DONOHO, DAVID L. AND JOHNSTONE, IAIN M. Minimax estimation via wavelet shrinkage 879–921

DREES, HOLGER. Optimal rates of convergence for estimates of the extreme value index 434–448
DÜMBGEN, LUTZ AND BERAN, RUDOLF. Modulation of estimators and confidence sets 1826–1856
DÜMBGEN, LUTZ. New goodness-of-fit tests and their applications to nonparametric confidence sets 288–314
DYKSTRA, RICHARD AND EL BARMI, HAMMOU. Maximum likelihood estimates via duality for log-convex models when cell probabilities are subject to convex constraints 1878–1893
EFROMOVICH, SAM. Simultaneous sharp estimation of functions and their derivatives 273–278
EFRON, BRADLEY AND TIBSHIRANI, ROBERT. The problem of regions 1687–1718
EL BARMI, HAMMOU AND DYKSTRA, RICHARD. Maximum likelihood estimates via duality for log-convex models when cell probabilities are subject to convex constraints 1878–1893
FALK, MICHAEL. Local asymptotic normality of truncated empirical processes 692–718
FAN, JIANQING, HÄRDLE, WOLFGANG AND MAMMEN, ENNO. Direct estimation of low-dimensional components in additive models 943–971
FINNER, H. AND ROTERS, M. Asymptotic comparison of step-down and step-up multiple test procedures based on exchangeable test statistics 505–524
FISHER, NICHOLAS I. AND BERAN, RUDOLF. Nonparametric comparison of mean directions or mean axes 472–493
FOURDRINIER, DOMINIQUE, STRAWDERMAN, WILLIAM E. AND WELLS, MARTIN T. On the construction of Bayes minimax estimators 660–671
FREUND, YOAV AND SCHAPIRE, ROBERT E. Discussion of "Arcing classifiers" by Leo Breiman 824–832
FREUND, YOAV, BARTLETT, PETER, LEE, WEE SUN AND SCHAPIRE, ROBERT E. Boosting the margin: A new explanation for the effectiveness of voting methods 1651–1686
GASSER, THEO AND WANG, KONGMING. Asymptotic and bootstrap confidence bounds for the structural average of curves 972–991
GEMAN, DONALD AND YALI, AMIT. Discussion of "Arcing classifiers" by Leo Breiman 833-837
GIRARD, DIDIER A. Asymptotic comparison of (partial) cross-validation, GCV and randomized GCV in nonparametric regression 315–334
GLIMM, EKKEHARD, KROPF, SIEGFRIED AND LÄUTER, JÜRGEN. Multivariate tests based on left-spherically distributed linear scores 1972–1988

GOLDSTEIN, LARRY, SAMUEL-CAHN, ESTER AND ASSAF, DAVID. A statistical version of prophet inequalities 1190–1197
GOLUBEV, G. K. AND LEVIT, B. Y. Asymptotically efficient estimation in the Wicksell problem 2407–2419
GREENWOOD, PRISCILLA E., MCKEAGUE, IAN W. AND WEFELMEYER, WOLFGANG. Information bounds for Gibbs samplers 2128–2156
GUTIERREZ, ROBERTO G., CARROLL, R. J., WANG, C. Y. AND WANG, SUOJIN. Local linear regression for generalized linear models with missing data 1028–1050
HALL, PETER AND RAIMONDO, MARC. On global performance of approximations to smooth curves using gridded data 2206–2217
HALL, PETER, KERKYACHARIAN, GÉRARD AND PICARD, DOMINIQUE. Block threshold rules for curve estimation using kernel and wavelet methods 922–942
HALLER, GERD AND DETTE, HOLGER. Optimal designs for the identification of the order of a Fourier regression 1496–1521
HÄRDLE, WOLFGANG, MAMMEN, ENNO AND FAN, JIANQING. Direct estimation of low-dimensional components in additive models 943–971
HARTIGAN, J. A. The maximum likelihood prior 2083–2103
HASTIE, TREVOR AND TIBSHIRANI, ROBERT. Classification by pairwise coupling 451–471
HE, SHUYUAN AND YANG, GRACE L. Estimation of the truncation probability in the random truncation model 1011–1027
HE, SHUYUAN AND YANG, GRACE L. The strong law under random truncation 992–1010
HENGARTNER, NICOLAS AND BARRON, ANDREW. Information theory and superefficiency 1800–1825
HILL, THEODORE AND MONTICINO, MICHAEL. Constructions of random distributions via sequential barycenters 1242–1253
HUANG, JIANHUA Z. Projection estimation in multiple regression with application to functional ANOVA models 242–272
ISHWARAN, HEMANT. Exponential posterior consistency via generalized Pólya urn schemes 2157–2178
JOHNSTONE, IAIN M. AND DONOHO, DAVID L. Minimax estimation via wavelet shrinkage 879–921
JONGBLOED, GEURT, VAN ZUIJLEN, MARTIEN AND VAN ES, BERT. Isotonic inverse estimators for nonparametric deconvolution 2395–2406
KERKYACHARIAN, GÉRARD, PICARD, DOMINIQUE AND HALL, PETER. Block threshold rules for curve estimation using kernel and wavelet methods 922–942
KIM, PETER T. Deconvolution density estimation on $SO(N)$ 1083–1102

KLEIN, ANDRÉ, MÉLARD, GUY AND ZAHAF, TOUFIK. Computation of the exact information matrix of Gaussian dynamic regression time series models 1636–1650
KNIGHT, KEITH. Limiting distributions for L_1 regression estimators under general conditions 755–770
KOO, JA-YONG AND CHUNG, HAN-YEONG. Log-density estimation in linear inverse problems 335–362
KREISS, JENS-PETER AND NEUMANN, MICHAEL H. Regression-type inference in nonparametric autoregression 1570–1613
KROPF, SIEGFRIED, LÄUTER, JÜRGEN AND GLIMM, EKKEHARD. Multivariate tests based on left-spherically distributed linear scores 1972–1988
LÄUTER, JÜRGEN, GLIMM, EKKEHARD AND KROPF, SIEGFRIED. Multivariate tests based on left-spherically distributed linear scores 1972–1988
LEE, SUN WEE, SCHAPIRE, ROBERT E., FREUND, YOAV AND BARTLETT, PETER. Boosting the margin: A new explanation for the effectiveness of voting methods 1651–1686
LETAC, GÉRARD AND MASSAM, HÉLÈNE. Quadratic and inverse regressions for Wishart distributions 573–595
LEVIT, B. Y. AND GOLUBEV, G. K. Asymptotically efficient estimation in the Wicksell problem 2407–2419
LI, GANG AND ZHANG, CUN-HUI. Linear regression with interval censored data 1306–1327
LI, GUOYING AND ZHANG, JIAN. Breakdown properties of location *M*-estimators 1170–1189
LI, W. K. AND LING, SHIQING. Limiting distributions of maximum likelihood estimators for unstable autoregressive moving-average time series with general autoregressive heteroscedastic errors 84–125
LING, SHIQING AND LI, W. K. Limiting distributions of maximum likelihood estimators for unstable autoregressive moving-average time series with general autoregressive heteroscedastic errors 84–125
LING, SHIQING. Weak convergence of the sequential empirical processes of residuals in nonstationary autoregressive models 741–754
LINTON, OLIVER, BICKEL, PETER J. AND NIELSEN, JENS P. On a semiparametric survival model with flexible covariate effect 215–241
LUO, ZHEN. Backfitting in smoothing spline ANOVA 1733–1759
MADSEN, JESPER AND ANDERSSON, STEEN. Symmetry and lattice conditional independence in a multivariate normal distribution 525–572

MALLAT, STÉPHANE, PAPANICOLAOU, GEORGE AND ZHANG, ZHIFENG. Adaptive covariance estimation of locally stationary processes 1–47
MAMMEN, ENNO, FAN, JIANQING AND HÄRDLE, WOLFGANG. Direct estimation of low-dimensional components in additive models 943–971
MARTIN, R. J., TANG, BOXIN AND CHENG, CHING-SHUI. Two-level factorial designs with extreme numbers of level changes ... 1522–1539
MASSAM, HÉLÈNE AND LETAC, GÉRARD. Quadratic and inverse regressions for Wishart distributions 573–595
MASSAM, HÉLÈNE AND NEHER, ERHARD. Estimation and testing for lattice conditional independence models on Euclidean Jordan algebras 1051–1082
MATHEW, THOMAS, SHARMA, MANOJ KUMAR AND NORDSTRÖM, KENNETH. Tolerance regions and multiple-use confidence regions in multivariate calibration 1989–2013
MCKEAGUE, IAN W. AND VAN DER LAAN, MARK J. Efficient estimation from right-censored data when failure indicators are missing at random 164–182
MCKEAGUE, IAN W., WEFELMEYER, WOLFGANG AND GREENWOOD, PRISCILLA E. Information bounds for Gibbs samplers 2128–2156
MÉLARD, GUY, ZAHAF, TOUFIK AND KLEIN, ANDRÉ. Computation of the exact information matrix of Gaussian dynamic regression time series models 1636–1650
MIKOSCH, THOMAS AND DAVIS, RICHARD A. The sample autocorrelations of heavy-tailed processes with applications to arch ... 2049–2080
MILHAUD, XAVIER AND BUNKE, OLAF. Asymptotic behavior of Bayes estimates under possibly incorrect models 617–644
MILLER, FORREST R, NEILL, JAMES W. AND SHERFEY, BRIAN W. Maximin clusters for a near-replicate regression lack of fit tests 1411–1433
MIZERA, IVAN AND WELLNER, JON A. Necessary and sufficient conditions for weak consistency of the median of independent but not identically distributed random variables 672–691
